# drive&act

**drive&act** is an emerging tech start-up based in Munich, aiming to accelerate the transition to sustainable mobility. We are developing the first AI based mobility platform that encourages and enables drivers to reduce vehicle's carbon emissions, to cut vehicle ownership costs and to improve road safety. In order to strengthen our team, we are looking for a Co-Founder with strong IT-Background.

Our team consists of three open, international, and highly motivated entrepreneurs with multiple years of experience in the mobility and tech industry at companies like Microsoft, Tesla, Mercedes-Benz, Porsche, BMW and Volkswagen. To this day **drive&act** has been awarded several times, and early this year won a place in the SCE start-up incubator in Munich.

## &yourTasks

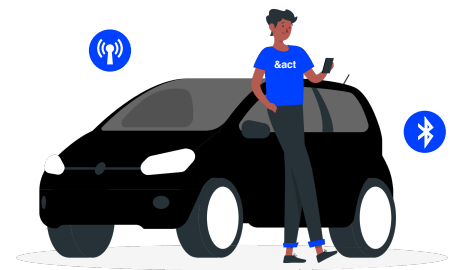

- Take over responsibility for the full stack development of our platform and mobile app
- Drive the development of our algorithm to process vehicle data extracted from our IoT-devices
- Contribute to our vision with your creativity and ideas
- Develop and fine-tune the company's technological strategy

## &yourProfile

- Strong knowhow in the field of quantitative analytics or data science
- Excellent programming skills, for example in Python, R, Scala, Java, or C++
- Experience with processing Connected Car data is a plus
- Hands-on experience in coding mobile apps for android or iOS
- Team player with Entrepreneurial mindset
- Open and pro-active communication skills in German or English

## &whyUs

- Full responsibility for your area and development budget
- Be part of the founding team and enjoy our great team spirit
- Shape the future of mobility
- Coaching sessions with mentors from SCE start-up incubator
- Exclusive access to workshops and trainings for your personal or professional development
- Office in in the heart of Munich with access to university labs and resources

**Interested? Send us your CV to [hello@andact.app](mailto:hello@andact.app) or via WhatsApp to 015678563909 and we'll reach out to you!**
