

## TECHNOLOGY ANALYST – INTERNSHIP

Ever wonder what it takes to be the next Elon Musk? Tired of the same management consulting job profile? Interested in working with the next major technology in space and unmanned aerial systems? Find out how markets and industries are transformed by innovation? Want to change the way aviation works? For more than 7 years now we are bringing together a worldwide startup community dedicated to aerospace.

Work with Boeing, Airbus, NASA, Thales, Safran, Lufthansa Technik, and many others and support Starburst's activities in Europe out of Munich. Get involved with the boldest venture capital investors and help us grow the next SpaceX and Lilium!

### Who are we?

Starburst is a global Aerospace consulting and technology scouting company focused on innovation, with offices in Munich, Paris, Los Angeles, Montreal, Tel Aviv, Abu Dhabi and Singapore. We are experts on business growth based on new products and new markets (providing market analysis, trends, drivers, go-to-market strategies, product-market fit, business planning, due diligence, valuation, and more), business digitization for productivity increase and revenue growth based on innovations, corporate innovation performance (assessment and strategy, incubators and corporate VC), and technology scouting.

### What will you be doing?

In direct collaboration with the global team, you will have strong autonomy and dive into various different subjects. You will contribute to the success of the projects like:

- Strategic consulting, market studies
- Evaluation of the innovation portfolio and redefinition of the innovation process
- Opportunity studies and development of new business models
- Development of the Starburst Startup Accelerator in Europe and worldwide
- Assessing startup technology viability and fit for the Starburst community
- Starburst key events like selection committees, matchmaking and other pitch sessions

### Are you:

- From a well-ranked engineering or business school
- A futurist and familiar with the ecosystem of startups
- A team player but capable of working independently

### Do you have:

- Enthusiasm, curiosity, resourcefulness, motivation to work in a small and innovative team
- Strong interest in the aerospace industry and innovation
- Experience in project management is a plus

### What sort of work can I be doing in a few years' time?

- Join a venture fund, steer investments into emerging aerospace technology
- Manage a corporate development fund and help shape business strategy for primes
- Start your own business or join a startup, teaming up with some of the brightest minds
