

Looking for App Developer

We are a tech-social Start-up and we are looking for an App Developer 30 hours per week (m/f/d)

Your Tasks:

Take ownership of the end to end development lifecycle of Android or iOS feature development (from technical design to integration test and participate in quality testing with our wider QA team).

Own the app solution and app technical architecture.

Conception, implementation and pragmatic documentation within an agile process model.

Re-using and improving our established frameworks and platforms to achieve our app roadmap.

Collaboration with our developer team for the roll-out of applications in test and production environments. With specific responsibilities in terms of the app store technical management.

Close teamwork with UX and QA team members allocated to your project.

Taking your own initiative for continuous quality & security improvements within the app team and the wider technology area.

Your Profile:

At least 3 years professional experience in native mobile app development

Passionate about building smooth native app experiences

Excellent knowledge of Android Java and iOS Swing native app development

Experience with different code languages (hybrid/native/Java/iOS) are favorable

Solid command of REST API integration and use inside apps

Good understanding of 3rd party app dev libraries like Timber, Kermit, AppCentre, Picasso, MMKV, Realm.io, OKHttp, Usabilla or similar (react native)

Ability to create robust, stable and maintainable app code and experience in using App UX analytics tools

You have either successfully completed education in software development (university, technical or advanced technical college) OR you are a self-taught guru with proven app store and github/lab track record

You are analytical, structured and logical thinker with attention to detail.

You have good English and/or German language skills.

Excellent communication skills "Getting-Things-Done" mentality

High organizational skills and independent way of working

Proactive work attitude and analytical understanding

Compliance - following internal and external guidelines for our technical team

Our Offer:

Start: November or latest in January 2022

30 hours per week employment agreement. Flexible timetables.

Gross salary according to the IT collective agreement is between € 2,428 and € 3,501 per month (14x) for 40 hours a week, depending on qualifications and performance. Overpayment possible according to qualification.

Also an Employee Stock Ownership Plan possible

Working in co-working spaces & on remote in Vienna

Workshops & Goodies with our international accelerator partners

Network with other start-ups in our international accelerator programs

Pitch events
