

Chief Product Officer (CPO) & Co-Founder

Location: worldwide, preferably in Munich

DeepVolt is a data science startup specialized in the planning of electric vehicle charging infrastructure. We develop Software-as-a-Service products for cities and charging point operators to accelerate the global deployment of chargers. Our first product determines the most profitable locations for charging stations and predicts their usage rates. We are at pre-seed stage and have produced a proof of concept.

DeepVolt is supported by UnternehmerTUM, Europe's largest center for innovation and business creation, Strascheg Center for Entrepreneurship, and LMU Innovation and Entrepreneurship Center.

To take DeepVolt to the next level, we are looking for a **CPO and Co-Founder** to **lead the vision, strategy, and execution of all product-related activities**, including:

- Client/user research,
- Product definition, incl. conducting interviews and co-creating,
- Product growth and marketing,
- Product analytics and metrics,
- Structuring the product organization, and
- Interviewing, recruiting, and supervising product employees and teams.

You should bring:

- Hunger to change things,
- Expertise and experience as a product owner,
- Passion for electric mobility, AI and smart cities,
- Experience working with city planners and/or charging point operators,
- Leadership and networking skills,
- Ambition, perseverance, and hard work,
- Substantial amounts of time to dedicate, and
- Fluency in English.

Ideally, you would also have:

- Ideas for new products, and
- Fluency in other languages.

In addition to your responsibilities as CPO, you will join DeepVolt as a Co-Founder and will contribute to the startup journey. Together, we will be working on making our common dream a reality. We expect you to be a driving force, show leadership, and be a good team player. You will receive a fair share of the startup.

We are two co-founders, both in our early 30s and based in Munich. We have an international background and experience, having studied, and worked in several places. The CEO is an electrical engineer working at a renowned institution assisting on electric mobility strategies. The CTO has a PhD in Machine Learning and works as a data scientist advising industry players on developing AI solutions.

If you are interested in becoming DeepVolt's CPO & Co-Founder, **please fill the application form by August 16, 2021**. If you have any questions, don't hesitate to reach out to us at deepvolt@outlook.com.
