

Want to be part of a Start-Up?

Our Journey

The goal for the Start-up is to provide people with easy access to science: In an app, both the results and the approach from studies are reduced to the most important core statements in a memorable way. Studies from the fields of psychology, health and socio-politics are in focus.

We are not alone in this journey: We have gained the Chair of Global Health at Technical University Munich as a supporter for the idea and convinced [UnternehmerTUM](#).

For the idea, we have already received the first confirmation for the 12-months [EXIST start-up scholarship](#), which is a funding program of the Federal Ministry of Economics and Climate Protection. The final application will be submitted in the next few months, meaning an expected start in Q1/2023.

Who we are

We are Aylin and Verena - after our Master's degrees and gaining professional experience in international companies over a couple of years we decided to found a Start-Up with an idea we are passionate about. We are staffed interdisciplinary and complementary with a focus on science communication, economics as well as marketing and sales and are looking for the next team member.

We want YOU in our team

To pursue our ambitious Start-up idea, we are looking for a Fullstack Developer (m/f/d) to join our team. As a full stack developer, you will design and develop our mvp within the 12-months EXIST program and afterwards the complex web applications for our Start-Up.

We do not expect you to be a professional app developer who knows every programming language and has built tons of apps. In other words, if there are topics you do not have professional expertise in but are eager and motivated to learn, this is the attitude we are looking for.

Your Qualifications

- Bachelor's or Master's degree in Computer Science or similar
- Experience in Fullstack App Development for both Android and IOS
- Preferred Programming languages: Java/Kotlin and Swift
- Skills in using databases such as SQL
- Ideally skills in User Interface Design
- Languages: English (proficient) and German (B2)
- Motivated to work in an agile start-up team

What is in it for you?

- Working fully remote (but being able to meet in Munich when necessary would be preferred)
- Monthly income of EUR 2,500 gross
- Chance to implement your own ideas
- Highly motivated and humorous team

Want to join the journey? Looking forward to your full application (CV, motivation for this vacancy) under specification of your possible starting date. You are welcome to submit your application in German or English to: application.startup2022@gmail.com

What are the next steps after submitting your application?

1. We will check your application
2. 1st round: We will setup a 30-minutes virtual call (we will pitch our business idea, get to know each other, discuss open questions)
3. 2nd round: We will setup a 60-minutes virtual call (if you made it to the 2nd round, you will get a case to prepare)
