

# Join Puray!

## What is Puray?

Puray is a young Startup based in Munich. We're developing medical catheters that prevent hospital related infections, using UV-C technology. We love being creative and developing meaningful products – and we are looking for YOU to complement our multidisciplinary team.

## Why Puray?

Founding from scratch is tough. With Puray you are joining a team with an award winning business plan, broad network and existing collaborations with industry and university partners – and on top of that:

- be part of a paid one year innovation program (EXIST)
- a patent pending
- a scalable business model
- full freedom to organize yourself and to form the concept

## What we are looking for

You have an entrepreneurial mindset and love to implement your ideas?

You want to join an exciting venture off the beaten track?

You have a background in physics/electrical engineering with experience in optics/photonics? Perfect!

## Interested?

Drop us a line, we are looking forward to talking to you!
